Why 'No' Mosquitoes at Disney World?

Despite its location in Florida swampland, there are few to no mosquitos at Disney World.

The reason behind that notable lack of airborne bloodsuckers stands as one of Disney's many great, yet little known, technical achievements, and (spoiler alert) the solutions are mostly based on how the movement of water is engineered and managed throughout the enormous and decidedly soggy property.

Weaving Design Narratives

Designing outdoor spaces with the concept of creating a “story” is the subject of a new book from Noah Nehlich, the founder of Structure Studios. Written for both watershapers and landscape professionals, the text offers useful advice on how design narratives result in meaningful designs, and satisfied customers.

The Tokyo Aquatics Centre

As the world works to re-emerge from the pandemic, the question remains whether or not the "2020" Tokyo Summer Olympics will go forward. If it does, the gathering will feature a beautiful new aquatic center, built for the games but designed for mixed use once the torch has been extinguished.
