Featuring

A Water-Treatment Power Trio

In his pursuit of delivering “gourmet water” for his clients, possible Steve Kenny turns to the powerful combination of ozone, UV and low levels of chlorine. Doing so, he says, creates synergies that cannot be achieved using individual technologies. The result is superior water quality that thrills his clients who invest in the combined treatment methods.

Finding the Passion for Pools

CAD specialist, Jeff Greene, 25, made a decision to dive head-long into the watershaping industry, and is now developing a career supporting builders with architectural and technical renderings -- even though he initially had little idea what building pools was all about. Here he shares his experience that led him to start his own firm and invest in a future working in water.

Water's Moving Music

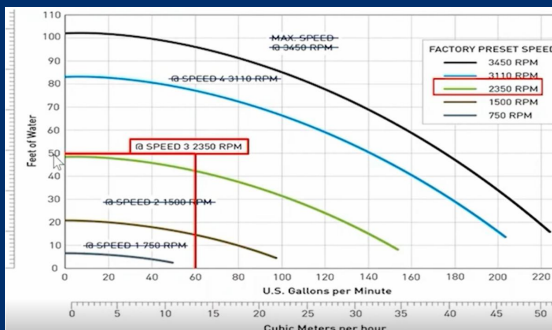

The sound of moving water is universally appealing, be it in nature or built environments. As editor Eric Herman points out here, using sound in a deliberate and thoughtful way, adds a vibrant dimension to the aquatic environment and ultimately the client experience, one they may not have fully anticipated.

What Makes Ice Slippery?

It might seem a silly question at first, but when stepping back and considering why ice is so slick, and poses such a hazard to us bipedal hominids in the form of slip-and-fall injuries, the scientific answer is more nuanced and surprising than we initially think.

WOLF PACK CORNER

WU Rocks the Jersey Shore

The Wolfpack welcomed '22 with a successful campaign in Atlantic City, where despite concerns about weather and the pandemic, NESPA's The Pool Show managed to draw an eager crowd that filled exhibit aisles and seminar rooms. With a full slate of upcoming events, Watershape University is poised to deliver top-shelf education far and wide.
