Featuring

Discovery: Sand Dunes 'Breathe' Water

By way of a recent major breakthrough in water-sensing probe technology, research scientists have discovered that sand dunes inhale and exhale water vapor -- a revelation that may hold broad implications for better understanding the Earth's hydrosphere, climate change, pollution, and possibly far beyond.

Woven Beauty

This project was all about making connections – explained David Tisherman in this vintage *WS* feature from October, 2001 – connections between the inside of a home and the outdoors; between surrounding wide-open spaces and an intimate backyard; between the colors of the hillsides and the materials used in crafting the watershape; between the clients' desire for recreation and their passion for beauty; and between the beauty of nature and the modern, sculptural lines of the design.

Aquatic Elevation

In our last edition on March 31, *WS* presented this story about the Aquarium of the Pacific in Long Beach, Calif. Unfortunately it appeared with the incorrect article link. We've corrected the error and apologize for the confusion.

Once more with feeling!
