Featuring

Concrete Cancer: ASR Part I

While concrete is the world's most used building material, it is comprised of natural elements and can be susceptible to potentially destructive problems. As Paolo Benedetti explains here in the first of a three part-series, Alkali Silica Reactivity (ASR) is among the most common and highest risk concrete maladies, especially for pool builders.

Not Enough or Too Much

Between the ravages of protracted drought and devastation of widespread flooding, the summer of 2022 will be remembered as a season of extremes. Besides realizing the obvious point that weather that is either too dry or too wet is dangerous, these crises illustrate the need for investment in, and commitment to, long-term infrastructure solutions.
