# WATER SHAPES

Exploring the Art and Science of Water

June 7, 2023

[watershapes.com](http://watershapes.com)

## Featuring

## Indoor Air Quality

Air quality in natatoriums, and ultimately the comfort and health of people using and working at those facilities, relies on a careful balance between operating parameters and system design. As Eric Knight explains here, achieving outstanding indoor air requires understanding the interrelated nature of these spaces and the systems designed to maintain optimum conditions.

## The Perils of Ocean Acidification

The data is clear, the vast ocean of planet earth is becoming more acidic as atmospheric carbon dioxide levels increase. But what does that change really mean? Is ocean acidification a problem now, or in the future? Or is it just a point of passing interest as nature adapts to changing conditions?

**Cascading Achievement**

The elegant contemporary watershapes at the recently completed Apple Store in Abu Dhabi, UAE, stand among Crystal Fountains' most sublime recent achievements, one in which they collaborated with an elite project team. Here's a look at how the highly transparent process unfolded, both literally and figuratively.

## Hydraulics in Hot Water (classic)

Designing for hydraulic balance and efficiency is critical for any watershape, but nowhere is it more important or more challenging than with inground concrete spas. The key, says Steve Gutai in this vintage *WS* feature, is paying close attention to the fundamentals.

## A Question of Intelligence

Is AI changing the world as we know it, and is that change for the better? While many people see only positives in the form of instant efficiencies and capabilities, others are not quite so hasty in their assessments.
