Featuring

Insulated Concrete Forms & PVC membranes (a perfect marriage?)

When it comes to favored pool construction techniques, some builders are exploring new options to meet the needs of the market and their own internal operations. Here's a perfect example of an enterprising watershaper exploring an innovative combination of construction systems.

Meet the Water-Quality Manager

Caring for pool water is a sacred trust, says Steve Kenny. It's a task that exists to ensure the health and safety of anyone and everyone who takes a dip. That's why he believes it's time for a new professional designation, the *water-quality manager*, technicians who apply artisan care to their clients' water.

Bridging Land and Water

The world of landscape architecture is very different from that of the pool designer/builder. Although the two disciplines share many common aspects and objectives, the approach to the process can be very, very different. Designer Scott Pancake has worked on both sides of the equation and has come to value the possibilities of combining both worlds.

Forging a Path (classic)

Designing and installing botanical gardens may be soul-satisfying, but it's also a remarkable professional challenge. As Raymond Jungles writes in the first of three articles on the subject, these projects have multiple audiences, each of them bringing massive expectations to the

table.
