Featuring

Durable for Dolphins

When it came time to install the interior surface at a new Florida dolphin facility, Cameron Rhodes turned to a silica-based spray-on treatment designed to enhance plaster durability – a move that prevented damage from a desperate and highly unusual measure during the filling process.

A Breakthrough in Fountain Flow Control?

With the introduction of the *Splash Valve*, its manufacturer believes the device has the potential to revolutionize the way show fountains and interactive water features are designed. Here's a peek behind the curtain at the product-development process.

Finding a Southern Treasure

Protecting its most beautiful waters and landscapes is a cultural priority seen as a civic responsibility in New Zealand. One example can be found in a shimmering body of water known as *Te Waikopopopu Springs*, which stands among the island nation's dreamlike places that are being treasured and preserved for future generations – and a great reason to visit.

Acid on Concrete (a damaging combination)

The nature of concrete-based materials dictates the risk of contact with acidic solutions. In this “white paper” on the subject, industry educators, Paolo Benedetti and Jon Temple offer a bold reasoning for turning away from long-practices that expose plaster to acidic water.

Vanishing Edge Craft

There are infinite details available for water-in-transit watershapes such as vanishing edge, slot-edge, and gutter pools, spas, and water features. Design aesthetics push us in certain directions while structural and mechanical engineering pulls us in others.
